| Configuration               | Standard | Optional |
|-----------------------------|----------|----------|
| Canopy                      | •        |          |
| Breaker pipes               | •        |          |
| Auxiliary pipes             | •        |          |
| Hydraulic quick hitch pipes | •        |          |
| Track                       | •        |          |

### **Telescopic chassis**

A simple single lever controls the width of chassis to as narrow as 990mm, allowing for smooth access to most openings and to as wide as 1320mm to enhance operation stability.

### Yanmar engine

Conforming to the highest emission standards Stage5 (Europe) a TF4 (North America), preferred by compact type equipment. With low noise and vibration, it is popular among compact equipment and it is easy to maintain the main components

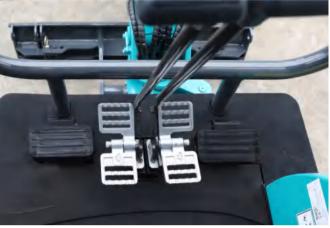

Easy to transport

### Hydraulic pilot traveling control

Breaker and boom swing are independtly controlled by side pedals.

Pedal control is added to reduce the labor intensity of the driver.

### Auto shifting function

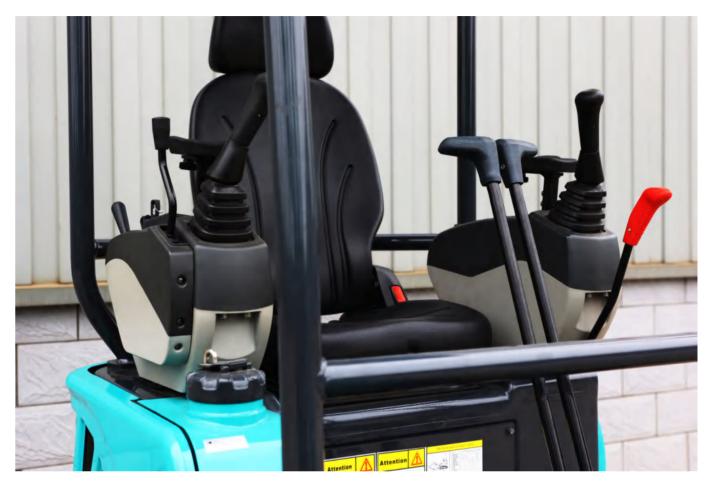

Strong and reliable walking system: large torque power output of travelling motor and automatic speed change function allow for free waling under various working conditions, with two options of tracks: steel track and rubber track.

### Comfortable and safety operation

FOPS- and TOPS-certified canopy assembly protects the driver from falling objects/tip-over.

### **Advanced monitor**

The rare high-end LED intelligent instrument not only displays the date, working hours, oil level and water temperature, but also integrates the functions of dual traveling speed switching, switch control of work lights and partial fault display.

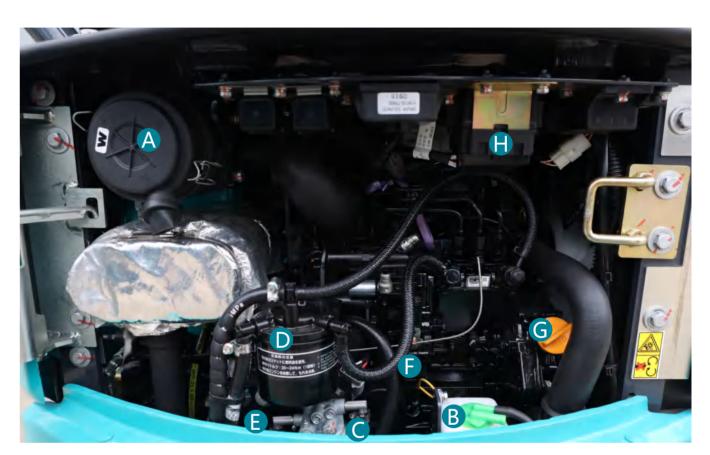

#### List of Items Displayed Coolant temperature • Traveling mode • Fuel level Working hours Operating light Monitor working indicator • Oil pressure warning • Overheat warning • Time

Charging indication · Various indicator of the engine

## **Easy service**

Air filter element, engine oil filter element, oil-water separator, fuel filter and auxiliary water tank are easily accessible. The centralized lubrication system is easy and simple to maintain.

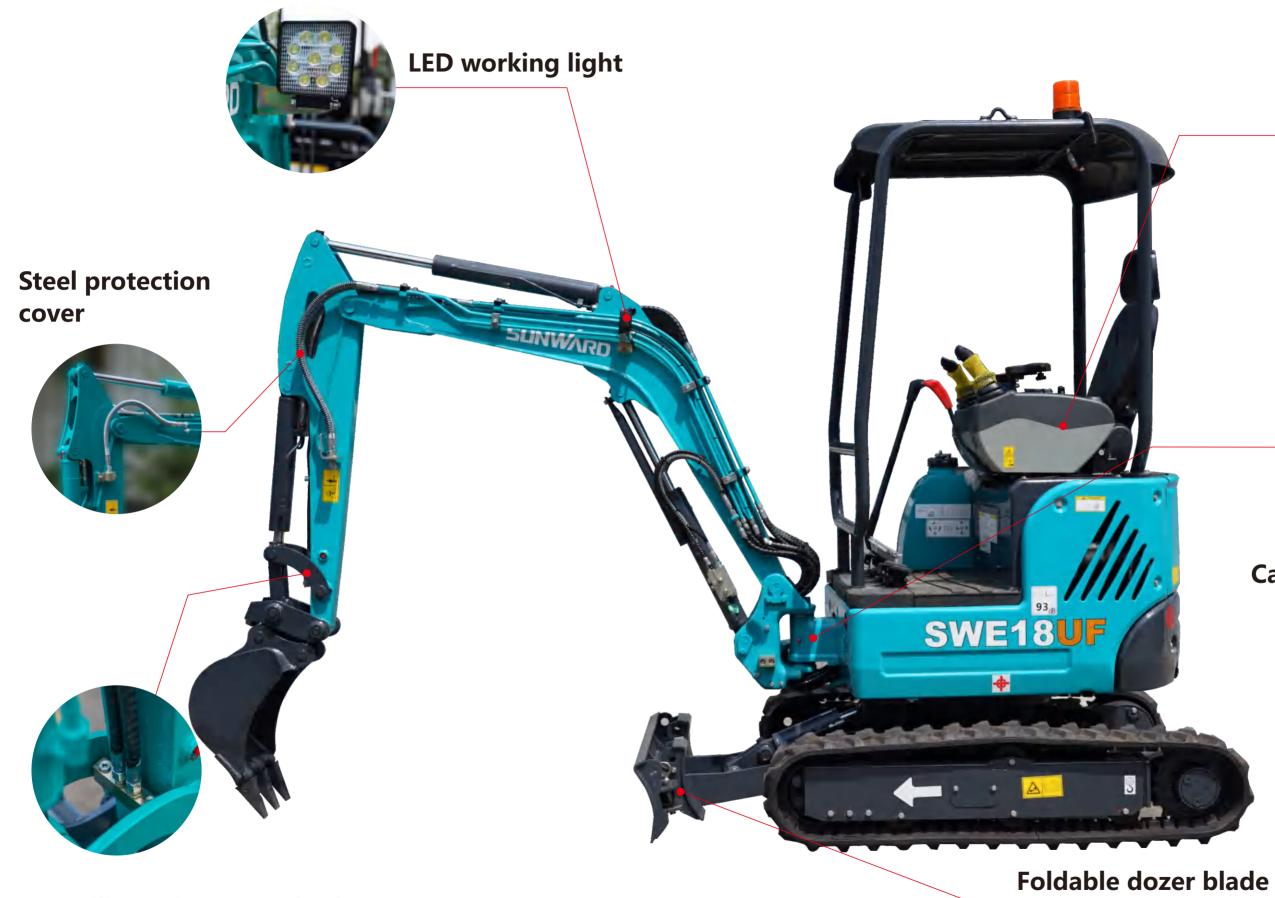

B Auxiliary tank

**()** Oil filter

Central electric control box

Auxiliary pipes(Standard) Hydraulic quick hitch pipes(Standard)

### Safety switch of pilot control

### **Cast slew connector**

## Equipment

The standard and optional equipment varies from country to country. For more information, please contact with us.
